

When it comes to what you really need in a satellite phone, IsatPhone Pro delivers. This is the first global handheld from Inmarsat – purpose-built for the most reliable satellite communications network in the world. With clear voice quality that you'd expect from the market leader. AST Australia is one of eight distributors worldwide for this new generation satellite phone.

This phone is designed to work in just about any conditions – in rain storms, dust storms, searing heat to sub-zero cold, tropical humidity or freezing fog. No worries about battery life when you're miles from anywhere, because it has the longest in the market. And we don't think satellite phones need to be complicated. Try it for yourself and see how simple it is.

- The essential services: satellite telephony, voicemail, text and email messaging, GPS location data
- The longest battery life: up to 8 hours talk time and up to 100 hours standby time
- The most robust handset: operates at -20°C to +55°C; dust, splash and shock resistant (IP54); humidity tolerance from 0 to 95 per cent

- The only satellite phone to support Bluetooth: place the handset on its side, with full manoeuvrability of the antenna, for easy handsfree use
- Easy to use: intuitive GSM-style interface; high-visibility colour screen; larger keypad for easy dialling with gloves on
- Reliable network connection: operates over global geostationary satellites that will be operational into the 2020s; significantly less possibility of call dropping

Physical Specifications

Dimensions	Length: 170mm (6.7")
	Width: 54mm (2.1")
	Depth: 39mm (1.5")
Weight	279g (9.8oz) - including battery
Display	High visibility colour screen
Interfaces	Micro USB
	Audio socket
	Antenna port
	Bluetooth 2.0
Operating range	-20°C to +55°C (-4°F to + 131°F)
Storage range	-20°C to +70°C (-4°F to + 158°F) (with battery)
Charging range	0°C to 45°C (32°F to 113°F)
Humidity tolerance	0 to 95 per cent

What's in the Box?

- Battery
- Chargers:
 - Mains universal AC charger (4 international adaptors)
 - Car charger - 10 - 30 volts
 - PC charger - micro USB cable
- Wired hands free headset
- Wrist strap
- Quick start guide (8 languages)
- Warranty documentation
- Support CD

IsatPhone Pro

Specifications

Specifications

Type	Lithium-ion, 3.7 volts
Talk time	Up to 8 hours

Web message-to-IsatPhone Pro	Free from: www.message.inmarsat.com
GPS location data	View position, send as text/email

About AST Australia

AST is a specialist and flexible provider of satellite hardware, airtime, service and support. We are able to provide satellite hardware, which 'works' on any of the satellite airtime services available in the world. We contract directly with each satellite system operator to provide airtime to end-users directly, indirectly, through distributors and via special project based contracts.

Applied Satellite Technology (AST) Australia's approach is to provide a complete satellite communications package that is suited to individual client needs based on a diversified range of products.

We offer reliability and support with our next day, right first time, service. We understand the importance of preparation, checking and technical support thereafter, when operating in remote locations, which by definition, is where the majority of our equipment is used.

AST Australia's client base is extensive and includes government, oil and gas companies, shipping companies, offshore contractors, international organisations, private individuals, mining companies, farmers, military and indeed, all manner of users that need communications outside of conventional terrestrial or cellular coverage.
